COVID-19 Moving Forward

Beach Transportation has always taken the safety and welfare of our travelers very seriously. Our commitment to cleanliness has always been a benchmark for our motor coaches. In response to COVID-19, we have added even more steps to our cleaning process.

- We will continue to thoroughly clean each motor coach when it returns from a trip. Every vehicle begins the next assignment having been cleaned and disinfected.
- In addition to routine cleaning, which has always included mopping the floor and wiping all high-contact areas we will increase the regularity of disinfecting high contact areas with one of our electrostatic fogging machines.
- For your safety, each motor coach is equipped with sanitized wet naps that are located in the lavatory.
- The driver's temperature will be taken and recorded prior to departing our terminal. If his/her temperature is 100.4 Fahrenheit or greater, he/she will not be permitted to drive, and a replacement driver will be arranged as quickly as possible.
- Drivers are trained in social distancing protocols and will practice these techniques throughout your travel experience.
- The driver will wear a face mask at all times with the exception of operating the motor coach. During this time, the driver may or may not wear a facemask as it could interfere with driving ability.
- Passengers are expected to wear facemasks at all times while boarding, traveling and exiting the coach.
- While on the motor coach, passengers are encouraged to follow the social distancing guidelines to the greatest extent possible.
- The driver will wash his/her hands or use hand sanitizer frequently throughout the trip.
- The seats closest to the driver will not be used by passengers in order to allow safe distancing between the driver and passengers while on the motor coach.

We will continue to be vigilant in our actions to ensure the safe travel of our employees and passengers and will post any updates as required.
